**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

(PCT Rule 43bis.1)

		Date of mailing (day/month/year) 23 JUN 2005
Applicant's or agent's file reference 2003UR033		FOR FURTHER ACTION See paragraph 2 below
International application No. PCT/US04/21363	International filing date (day/month/year) 02 July 2004 (02.07.2004)	Priority date (day/month/year) 15 September 2003 (15.09.2003)
International Patent Classification (IPC) or both national classification and IPC IPC(7): F16G 11/00 and US Cl.: 403/307		
Applicant EXXONMOBIL UPSTREAM RESEARCH		

1. This opinion contains indications relating to the following items:

- Box No. I Basis of the opinion
- Box No. II Priority
- Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- Box No. IV Lack of unity of invention
- Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- Box No. VI Certain documents cited
- Box No. VII Certain defects in the international application
- Box No. VIII Certain observations on the international application

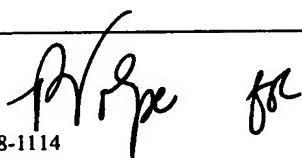

2. **FURTHER ACTION**

If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

3. For further details, see notes to Form PCT/ISA/220.

WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/US04/21363

Box No. I Basis of this opinion

1. With regard to the **language**, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

This opinion has been established on the basis of a translation from the original language into the following language _____, which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).

2. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

a. type of material

- a sequence listing
 table(s) related to the sequence listing

b. format of material

- in written format
 in computer readable form

c. time of filing/furnishing

- contained in international application as filed.
 filed together with the international application in computer readable form.
 furnished subsequently to this Authority for the purposes of search.

3. In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

4. Additional comments:

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.

PCT/US04/21363

Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

1. The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been examined in respect of:

- the entire international application
 claims Nos. 3

because:

- the said international application, or the said claim Nos. _____ relate to the following subject matter which does not require an international preliminary examination (*specify*):

- the description, claims or drawings (*indicate particular elements below*) or said claims Nos. _____ are so unclear that no meaningful opinion could be formed (*specify*):

- the claims, or said claims Nos. 3 are so inadequately supported by the description that no meaningful opinion could be formed.
 no international search report has been established for said claims Nos. _____
 the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the Administrative Instructions in that:
 the written form has not been furnished
 does not comply with the standard
 the computer readable form has not been furnished
 does not comply with the standard
 the tables related to the nucleotide and/or amino acid sequence listing, if in computer readable form only, do not comply with the technical requirements provided for in Annex C-bis of the Administrative Instructions.
 See Supplemental Box for further details.

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.
PCT/US04/21363

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims <u>8</u> _____ YES
	Claims <u>1,2 and 4-7</u> _____ NO
Inventive step (IS)	Claims <u>8</u> _____ YES
	Claims <u>1,2,4-7</u> _____ NO
Industrial applicability (IA)	Claims <u>1,2,4-8</u> _____ YES
	Claims <u>NONE</u> _____ NO

2. Citations and explanations:

Claims 1, 2 and 4-7 lack novelty under PCT Article 33(2) as being anticipated by Sell (US 5,655,794). Sell discloses a threaded connection for connecting first and second components having a pre-defined axial alignment, comprising a first set of threads provided on a first component connection end of the first component; a second set of threads provided on a second component connection end of the second component, the first and second components being disposed such that the first component connection end abuts or is separated from the second component connection end; and a connection collar adapted to be threaded onto the first component connection end, and threaded onto the second component connection end.

Claim 8 meets the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest a threaded connection for connecting first and second components having a pre-defined axial alignment, comprising a spacer having a threaded end and a top end, such that a first component connection end is attached to the threaded end of the spacer and a second component connection end abuts the top end of the spacer.

Claims 1, 2 and 4-8 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.

PCT/US04/21363

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the questions whether the claims are fully supported by the description, are made:

Claim 3 is objected to as lacking clarity under PCT Rule 66.2(a)(v) because the claim is not fully supported by the description. The application, as originally filed, did not describe a threaded connection wherein the first set of threads is internally disposed on the first component connection end and the second set of threads is internally disposed on the second component connection end.
